

SG Website Care

After your new website has been launched, we offer an optional SG Care package. Our SG Care package includes everything you need to keep your website running smoothly for your customers. As a part of SG Care you receive:

- **Hosting:** Your site will be hosted on reliable, trustworthy servers that keeps your website's uptime at around 99.9%.
- **Maintenance:** We provide daily backups and ensure Wordpress CMS and plugins are up-to-date. You never have to worry about your website falling out of date with us looking after it.
- **Support:** Having something changed or fixed on your site is always just a call, text, or email away. We are always available to fix a problem as soon as it crops up, and you don't have to spend hours on the phone waiting to talk to a "representative." You talk with us, directly.
- **Protection/Security:** We protect your site by integrating Sucuri Security; Sucuri is the industry leading anti-virus and anti-malware software. Additionally we install a SSL certificate on your site to only allow secure connections from a web server to a browser.
- **Speed Optimization:** All of our websites utilize a Content Delivery Network and minimizers to speed up your site. Content Delivery Networks maximize the availability and performance of your website.
- **Background Fixes:** The best problems to have are the ones that are fixed before you know they happen. We take care of the minor issues that crop up, like broken links, before you even have to ask.

Our SG Care package is like getting a dental cleaning or a car tune-up. We spend a little bit of time implementing safety measures and tending to minor issues as they crop up, to save you from spending much more time and money on much larger problems later.

We offer this service at \$250/month. This includes support, maintenance, support, speed optimization, and up to 3 hours of background fixes for any issues that crop up or page updates. In our experience, 3 hours is more than enough time to deal with these minor issues or updating pages. Should we see a problem that will take more time than that, we will contact you and advise you about it directly.
